EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Allison Tulino on March 1, 2010.

The application has been amended as follows:

In claim 1, line 4, wherein the claim recites "correcting unit provided thereon," changed "provided" to --attached--.

In claim 3, line 4, wherein the claim recites "pressing members provided on the green tire support table", change "provided on" to --attached to--.

2. The following is an examiner's statement of reasons for allowance:

3. Claims 1 and 3 recite a method and apparatus for correcting the shape of a green tire comprising a green tire support table, a lower tire bead correcting unit which is attached to the support table, and an upper tire bead correcting unit; wherein the lower and upper tire bead correcting units comprise a plurality of radially movable pressing members which engage with a tire bead and move outward to shape the bead into a completely round shape of a predetermined diameter and wherein the lower and/or upper tire bead correcting units are vertically movable relative to the other to adjust the axial distance between the upper and lower tire beads. The closest prior art

Art Unit: 1791

of record is represented by Kaneko (4,600,370) and Takahashi (JP2002-079589).

Kaneko discloses a method and apparatus for correcting deformities in a tire wherein a device comprising radially extending members 26 and 32 engage with tired beads and move apart axially. The device operates by lifting the tire off a support table 70, retracting the upper bead unit while retaining the lower bead unit in lowered position, and then transporting the tire to a vulcanization mold. The lower bead unit of Kaneko is designed to work in tandem with the upper bead unit (directly attached) in order to shape and transfer the green tire. A person having ordinary skill in the art would not be motivated to attach the lower bead correcting unit to the support table as such would substantially alter the function of Kaneko since the tire is intended to be lifted off the initial support table. Takahashi discloses a tire reshaping apparatus and method but the bead correcting units only move radially and no axial reshaping is performed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ROBERT DYE whose telephone number is (571)270-7059. The examiner can normally be reached on Monday to Friday 8:00AM to 5:00 PM EST.

Art Unit: 1791
